About Skuny

Skuny is a dynamic Bioscience company committed to discovery and commercializes active ingredients and formulas derived nutritional and pharmaceutical products utilizing proprietary biotechnology including Bio-separation, Bio-enzyme and Fermentation.

Our Valued Products, Solutions and Services

Skuny is well suited to add great value, support, and innovation to the whole value chain both customers' current and future product portfolio(s) from R&D, ingredients supply, formulas upgrade, custom manufacture, FDF and so on in Food, Nutritional, Cosmetic and pharmaceutical industries.

Our Mission

To provide the most beneficial ingredient solutions in Food, Nutritional, Cosmetic and Pharmaceutical industries that contributes to improve quality of our life.

Our Strategy

With persistently innovation, we have developed some new technological platforms as MSET™, SOB/SET™ and BtBLife™ and so on. We have strengthened the cooperation with more and more clients who possess innovation abilities. Throughout the joint cooperation, we have created more valuable pharmaceutical products, nutritional supplements, cosmetics, and these are indeed bringing more hope and solutions to the people who are suffering Cardiovascular, Alzheimer, Cancers and so on diseases.

Our Honor

Skuny has been awarded the "The National Key New Product Award", "Chengdu Science and Technology Progress Award", "Sichuan Innovative Enterprises" and other honors, becomes the National and Chengdu Key high-tech enterprises.

» Technology

Over decades of research and development by tens of scientists, Skuny has created the world's leading technology systems from ingredients to applications including MSET™, SOB/SET™, BtBLife™ and so on. And this unique advantage enables Skuny provide tailor-made ingredient solutions and finished-dosage-formulation(FDF) by strategic merge of high quality, cost-effectiveness and innovative imaging to the whole healthy industry from food, nutrition to pharmaceutical.

MSET™ (Molecular Selective Enrichment Technology) is a proprietary and patented platform that allows for the most advanced separation of isomers and similar polarity compounds, economically and efficiently. The MSET™ technology platform applies to lipid and solid-state compounds alike, under the MSET™ – Lipid and MSET™ – Botanical technologies, respectively.

SOB/SET™ (Secondary Oxidation Blocking/Stability Enhancement Technology) is another proprietary and patented platform of Skuny and can be applied to the manufacturing of both individual ingredients, as well as FDF products. The technology platform includes: oxygen blocking manufacturing and packaging, oxidation controls and oxidation removal, low/controlled temperature drying and packaging, and micro-encapsulation, among other innovative features.

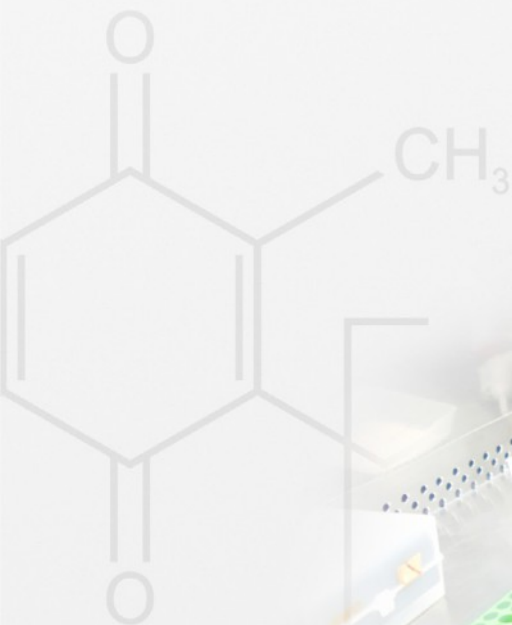

BtBLife™ (Bridge Transport Technology System For Improving Bioavailability) is the third pillar of the Skuny unrivaled technology platform, and can also be applied to both individual ingredients, as well as FDF products. This unique technology platform enhances both relative bioavailability and well as bioefficacy, by carrier transport, cell disruption, and Nano-targeting, among other innovative features.

» Manufacture

Our best-in-class ingredient and FDF manufacturing are done at our state-of-the art, NSF® cGMP, FDA CFR111/CFR211 cGMP facilities within China, USA and Canada, respectively. Our manufacture is coupled with the most novel, proprietary, and patented technology platforms as MSET™, SOB/SET™, BtBLife™ and so on, assuring the absolute best-in-class quality, cost, capacity, etc. for ingredient, formula and FDF that Skuny manufacture.

Our manufacturing facilities are remarkably well equipped with several advanced production lines including ingredient extraction and separation production lines, the low-temperature anaerobic lipid separation and purification production lines, emulsion and microencapsulation production lines, blending and granulating production lines, FDF of tablet, capsules, softgel, gummy, etc. production lines, and etc. These best-in-class manufacturing capacities enable us supply 2000MT lipid ingredients, 1000MT Botanical Ingredients, 8000 MM Softgels, 5000 MM Powdered Drink Strips, 5000 MM Capsules, 10000 MM Tablets and so on.

» Branded Products

The primary branded products in Skuny include Lipid derived ingredient solutions and Botanical derived ingredients solutions,

Lipid Ingredient Solutions

MEGAFULLIFE® is a series of high quality, innovative and scientifically supports lipid ingredient solutions for food, dietary supplements, cosmetic and pharmaceutical industries. It's mainly included by Omega-3, 6,7,9 Medium Chain Triglycerides(MCT) and Phospholipid(Phosphatidylcholine(PC), Phosphatidylserines(PS), L-a-Glycerolphosphorycholine(L-GPC), etc.by Oil, Emulsified oil, Powder, Granule, Softgel, Chewable Softgel, Candy, Tablet forms and so on.

MEGAFULLIFE®

- Omega-3 Ingredient Solutions
- Omega-6 Ingredient Solutions
- Omega-7 Ingredient Solutions
- Phospholipids Ingredient Solutions
- Medium Chain Triglycerides Solutions

Botanical Ingredient Solutions

Skuny is committed to provide more healthy ingredients and solutions derived from botany/herbs to every stage from R&D to commercial for customers. Under which we utilize proprietary and patented process route technology to produce ingredients across four classes, it includes Standardized Botanical Powders(GreenSBio™), Full Spectrum Botanical Extract(FULLSBIO™), Standardized Botanical Extract(Highsnutri™) and Monomer Compounds(Pharsnutri™).

GreenSBio™
Standardized Botanical Powders

FULLSBIO™
Full Spectrum Herbal Extract

Highsnutri™
Standardized Herbal Extract

Pharsnutri™
Monomer Compounds

» Quality

Global Leader in Quality Assurance & Quality Control

Skuny has established a comprehensive quality management system in line with International standards and regulations including ISO, HACCP, GMP and so on. This brings Skuny more opportunities to serve more consumers who expect quality of life, through our high-quality ingredient solutions comply with the highest regulatory requirements of leading health authority such as GOED/IFOS/US.FDA/CFDA/KFDA/PMDA/EU.FDA/JFDA etc.

Quality forms a foundational core of Skuny, and through our remarkably well equipped QA/QC Centre, and we are able to assure the gold standard in quality, including testing by: HPLC, UPLC, LC-MS, GC, ICP-MS, HP-TLC, DNA(PCR), NMR, MS-GCP among other methodologies, in addition to the extensive and expansive QA/QC Centres noted, Skuny maintains important strategic relationships with such globally recognized 3rd party analytical laboratories as NSF International, Nutrasouce(IFOS), Eurofins, Covance, ChromDex, and others.

» Certificate

Setting the Global Standard In Accreditations & Certifications

The manufacturing, warehousing and logistics, R&D and professional sites under the Skunyt umbrella total nearly 1-million square feet globally, and are certified, audited and/or inspected by one or more of the following:

The above is yet further assurance that the innovative solutions provided by Skunyt set the global standard and are compliant with the most important regulatory requirements—including those in the Asia, North America, Europe and others.

» Differentiation

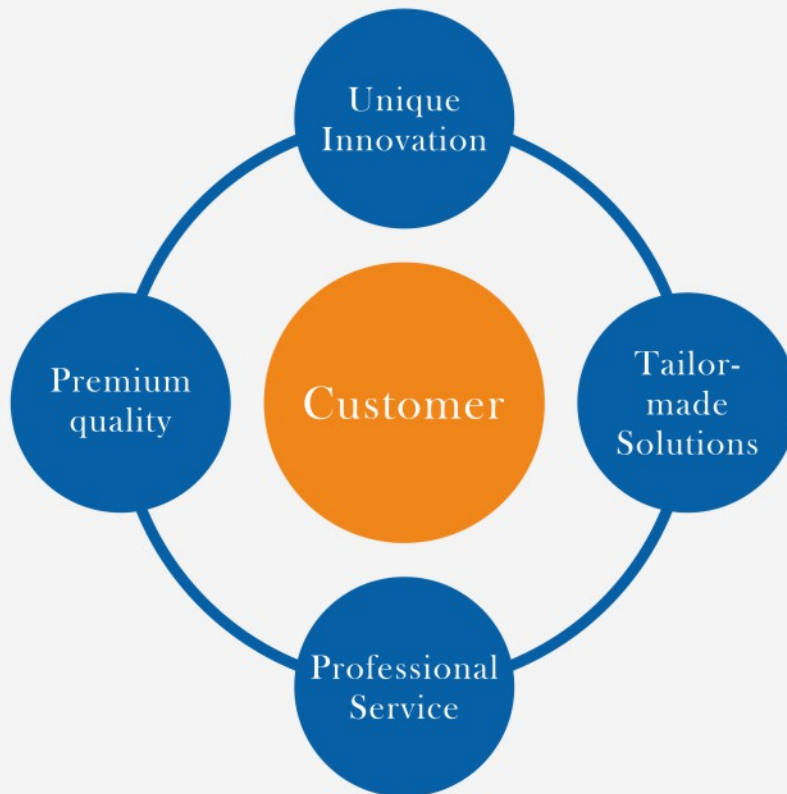

To provide tailor-made ingredient solutions by strategic merge of high quality, cost-effectiveness and innovative imaging, to meet individual client requirement at every stage.

Innovation, we manufacture not only quality ingredients with invention patent but also making formula/solutions with proprietary technology to help customers develop new products and improve competitiveness.

Quality, we deliver not only quality products but also a positive responsibility with 100% Transparency, Traceability and Sustainability.

Solution, we deliver not only quality ingredients but also an innovative solution with cost reduction, quality and supply guarantee, products upgrading, new product developing at every stage of client's developing.

Service, we serve not only professional and efficient but also personality and high value-added ratio with products upgrading, competitiveness improving, strategy alliance, etc.
